Response to Amendment

1. Acknowledgment is made of applicant's cancellation of claims 9, 10, and 12. Claims 1-8 and 11 are pending in the application.

Claim Rejections Withdrawn

2. All rejections of claims 9, 10, and 12 are withdrawn in light of the cancellation thereof.

3. The rejection of pending claims 1-8 and 11 under 35 U.S.C. 112 second paragraph for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the unclear recitation of "significant lesions" is withdrawn in light of applicant's arguments and amendments thereto.

4. The rejection of pending claims 1-8 and 11 under 35 U.S.C. 112 second paragraph for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the unclear recitation of "characterizing fraction" is withdrawn in light of applicant's arguments and amendments thereto.

5. The rejection of pending claims 1-8 under 35 U.S.C. 112 first paragraph for lacking the full scope of enablement, for encompassing diagnosis by amplification and in situ hybridization, is withdrawn in light of applicant's arguments, amendments, and cancellations.

6. The rejection of pending claims 2 and 8 under 35 U.S.C. 112 first paragraph for lacking enablement for the recitation of an absence of MN/CA9 antigen being indicative of a benign lesion is withdrawn in light of applicant's arguments.

Art Unit: 1642

7. The rejection of pending claims 3-8 and 11 under 35 U.S.C. 102(b) as anticipated by Liao et al., Cancer Epidemiology and Biomarkers, Volume 5, pages 549-557, 1996, IDS Document #27 is withdrawn in light of applicant's arguments regarding the specific staining patterns instantly claimed.

8. The rejection of pending claims 3-8 and 11 under 35 U.S.C. 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over is withdrawn in light of applicant's arguments regarding the specific staining patterns instantly claimed.

Claim Rejections Maintained

9. The rejection of claims 1 and 2 under 35 U.S.C. 102(b) as anticipated by Liao et al., Cancer Epidemiology and Biomarkers, Volume 5, pages 549-557, 1996, IDS Document #27 is maintained for reasons of record.

Applicant argues that Liao et al. fails to teach a method of observing MN/CA9 distribution to discriminating between low grade and significant lesions. Applicant's arguments filed 3-7-2001 have been fully considered but they are not persuasive.

As set forth in the previous Office Action, Liao et al. evaluated MN/CA9 distributions and correlates the staining patterns to AIS (adenocarcinoma in situ) and SIL (which constitutes a significant lesion as defined in the instant application) and further Liao et al. teaches that the absence of MN/CA9 expression in atypical cells and the presence of MN/CA9 expression in NEC (normal epithelial cells) to be indicative of LSIL or dysplasia (atypia) (which constitutes a low grade lesion as defined in the instant application). (See, for example, abstract) Therefor Liao

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
